

# Crafting Tokens

To reduce sheet management and bookkeeping problems, many items can be converted to 'tokens'. These tokens are an abstraction similar to hit points, representing useful materials extracted through different means. Tokens are usually associated with tools and tool proficiencies, but they can be bought at shops at a standardized price.

There are 3 tiers of tokens: basic, advanced, and ultimate.

To create a potion or poison, a character must succeed on a Alchemist's kit or Poisoner's tool check with the DC dependent on the highest tier of token used.

When creating an item in this way, you must consume 1 basic token for every 25gp of the final item price. You must in addition to that consume 1 advanced token for every 100gp and 1 ultimate token for every 400gp of the final item price.

- ✓ Example: to create a dose of wyvern poison that costs 1200gp you would need to consume 3 ultimate poison tokens, 12 advanced poison tokens, and 48 basic tokens

A token of higher rarity can always be substituted for 4 tokens of a lower value.

Example: to create a dose of wyvern poison that costs 1200gp you would need to consume 3 ultimate poison tokens, 3 ultimate poison tokens replacing the advanced tokens, and 3 ultimate poison tokens replacing the basic tokens (9 ultimate tokens total)

You can attempt to create a token of higher rarity from tokens of lower rarity. With a successful tool check, you can convert 5 tokens in to 1 token one tier higher.
